intuitships

ERP and Asset Management System

intuitships® - a cloud based ERP & Asset Management System enables efficient and cost effective operation of large fleet of vessels.

INTUITSHIPS®...

...integrates Offshore, Vessel, Supplier and Owner seamlessly with real-time data updates. intuitships® designed for best user experience - intuitive and predictive. intuitships®, drive significant operational cost saving by streamlining the business processes and using information (data) to define performance across the enterprise and beyond.

At InuitT, we built our solutions by breaking stereotypes and created a product to address bottle-neck of processes and pain points of Ship Owners, Technical & Crew Managers, and Suppliers. InuitT runs all IT Operations as per ITIL and ISO/IEC 27001 standards.
